Freedom Homes are a leading architecture firm working across London and the surrounding areas. We specialise in residential extensions and loft conversions to help turn your dream home into a reality. Freedom Homes (11509466) is an Architectural Design Consulting company specialising in property renovations and extensions. We employ an experienced design team, registered with ARB and RIBA that produce cutting edge designs and are accustomed to meeting and exceeding our clients' demands. We take pride in our levels of customer service which bring us high numbers of repeat clients and customer referrals. We work closely with our

clients, offering advice on how to achieve the best possible results and how to turn property dreams into reality. Our aim is to remove all elements of stress from our customers experience and to make the planning and approval stage of property renovation an enjoyable and a quick one. Having received approval for applications in almost every borough throughout London, we have the experience and understanding of exactly what the council expect to see to ensure you receive approval as quickly as possible. Freedom Homes offers a comprehensive service, taking care of everything you will need from start to finish to ensure there are no hidden costs and you will not have to outsource any part of your project. We also work closely with a number of building contractors that we are able to recommend, so you can compare quotations for construction to make sure you are receiving the best price and service. In today's property market, home extension or redesign can prove to be a great investment in addition to creating the home you've always dreamed of. If you're interested in redesigning your property give us a call and we'll show you what you're able to achieve. Freedom Homes offers a Design and Build package for your project, from the initial plans through building the project.

About Us

Freedom Homes, is a leading architecture firm working across London and the surrounding areas. We specialise in residential extensions and loft conversions to help turn your dream home into a reality. Architectural Services in London We offer a comprehensive service from the design, led by our RIBA and ARB registered Architect, to all the documents you need to commence your project; including planning permission, party wall notices and the building works. We ensure all relevant certificates are obtained upon completion. We pride ourselves on our customer service, and work with our clients, offering advice on how to achieve the best possible results and how to turn property dreams into reality. We also work closely with council planners to ensure that our designs receive swift planning turnaround. Our aim is to remove all element of stress from our customers experience and to make the planning and approval stage of property renovation an enjoyable and quick one. In today's property market, home extension or redesign can prove to be a great investment in redesigning your property. Give us a call on 02036335060 and we ill show you what you are able to achieve. We understand the

page 2 / 5

struggles of day to day life, balancing work, children and London traffic. Our initial site visit is extremely flexible. From 7am on a Saturday morning to 10pm on a Friday evening, we are always available to visit at a time that suits you, 7 days a week.

The Architectural Process

At Freedom Homes, we follow our architectural process to the letter, to ensure all of our clients needs are met. Get in touch today to discuss your project.

Process Site Survey

We will visit the property as soon as we are able to. This will allow us to perform our site survey where we will collect the necessary data from your property such as pictures, measurements and boundary lines.

Design Stage

The information collected from the site survey is then forwarded onto one of our design team, who will then produce the first draft of plans and have them back to you within 10 working days. Our designer will work closely with you to get the plans to an ideal design stage and ready to submit them to the council.

Submission of Application

Our experienced administration team will determine which application is required to be submitted to the council then gather all necessary documentation to accompany the submission. The application process can take up to 10 weeks depending on how busy your particular council is at the time of submission.

Building Regulations

Once approval is received from the council we will start work on the building regulation plans that are used by your building contractor and building control.

Building Control Application

Upon completion of your building regulation plans we will forward these to our engineer to produce calculations for any steel to be used within your design. We will also submit your application to building control so you are able to start construction work as soon as possible.

The Build

Building control will visit the site throughout the construction phase to ensure your build meets UK building standards and we will liaise with your building inspector throughout to ensure the build progresses as smoothly as possible. The above process will typically be around 3 months before construction may begin. This includes; drawing time, council applications and building control applications.

Build Process

Once you have gained planning permission, it's important to ensure that the build is carried out correctly and to meet that of the agreed plans. We are always on hand

to assist and can help you choose the right builder for your project. The Build At this point you have gained planning permission, received all relevant documents, drawings and calculations and are ready to instruct a builder to commence construction. Although our service is now complete, we are always contactable for any questions, queries or general advice you or your builder may have during the build process and ensure our building regulation drawings are approved by Building Control. Choosing the right builder for your construction can be a difficult decision, with the worry of maintaining a strict budget coupled with the stories of so called 'cowboy builders' is enough to make anybody feel uneasy. For this reason, we have compiled a list of recommended contractors, filled with builders whom we have received positive reviews for from our previous customers. Have a look at our 'Design and Build' page, with full details of the package, [here](#).

Creative Input

We offer a number of design options to suit each of our clients individual needs and work closely with our customers until we have achieved the ideal design. Leading
